### More Big Problems with Human Evolution

DNA or RNA are like the DVD, and the cellular machinery which reads that information and converts it into proteins are like the DVD player. It is not possible to build such a system gradually, one component at a time, since it cannot function unless all components are present. The constraints of historical science are such that the origin of life may never be understood.

### The Biggest Problems for Evolution

What benefit does sexual reproduction confer that could possibly compensate for the massive disadvantages. Scientists continue to discover uses for such organs and only a small number are still considered vestigial. Lynch doesn't believe natural selection is up to the task.

### What are some flaws in the theory of evolution?

See also Steven Poe and Marvalee H. While much remains to be learned about the workings of our genome, the research trendline is unambiguous: the more we study non-coding DNA, the more we find evidence of widespread function. Such conflicts between gene-based trees are extremely common.

### Issues and Problems with Evolution Theory

Despite what some claim, punctuated equilibrium is not a more refined version of gradualism. New York, NY: Washington Square Press, Chapter 3, pp. The interest in human evolution has also resulted in much research on this topic.

### What Are the Top Ten Problems with Darwinian Evolution?

Horatio Hackett Newman, quoted in The World's Most Famous Court Trial: Tennessee Evolution Case, 2nd ed.

### Problems with Evolution

I understood very little of the book except the concrete examples.
