Whether to have a second child or not? An integrative approach to women's reproductive decision

In order to improve accountability and uphold existing policy, local experts offered various suggestions, including: maximizing interstate coordination; developing memoranda of understanding among development stakeholders with a monitoring agency; granting corporate and government contracts to builders only upon provision of required services e.

Whether to have a second child or not? An integrative approach to women's reproductive decision

However, there were still telling indications that racial prejudice, discrimination, and segregation have not disappeared.

Development of the informed health choices resources in four countries to teach primary school children to assess claims about treatment effects: a qualitative study employing a user

Corsi DJ, Neuman M, Finlay JE, Subramanian S. To recruit user-test participants, we used purposeful sampling to include year 5 students 10 to 12-year-olds and their teachers. WHO, UNICEF, UNFPA, World Bank Group and the United Nations Population Division.

Prevalence of child marriage and its impact on fertility outcomes in 34 sub

Few suburbs today are all white; many people of color are moving to the suburbs; and some white families are moving back to the city.

The responses to the questions about improvements in care and what the respondents would like to say to policy makers were also used to generate quantitative data in a more formal way: the responses were read, a list of topics were generated, each response was coded for up to three

topics and the numbers and proportions for each topic were calculated.

Clinicians' Perspectives on Barriers to Discussing Infertility and Fertility Preservation With Young Women With Cancer

Economic constraints directly affect many families and individuals by dragging down their income, but also by fueling general perceptions of uncertainty about future economic conditions Kreyenfeld ; Vignoli, Rinesi and Mussino ; Raymo and Shibata , even among those who are not directly affected by massive lay-offs or company bankruptcy Sobotka, Skirbekk, and Philipov ; Hofmann, Kreyenfeld, and Uhlendorff. Based on socially-constructed perceptions, people build their narratives of the future so as to take decisions in a condition of uncertainty.
