National Topographic System Maps

Each file data set consists of one NTS unit at either the 1:50,000 or 1:250,000 scale.

1:25,000 National Topographic System (NTS)(downloadable)

For example, if you use the Find a location tool and search for Fogo, zoom to the town and select the current map extent your map will look like this. The third cycle is planned for completion in 2018.

Maps & Atlases

Please see their page for questions about use and copyright.

US Topo: Maps for America

Canadian Geographical Names Database CGNDB The tool stores names records for populated places and physical features across Canada.

National Topographic Database

Through the Geodata Clearinghouse you can find datasets related to forests and grasslands. The National Map is easily accessible for display on the Web through such products as topographic maps and services and as downloadable data.

Maps

Basemap and reference overlay are not included in the extraction package. By clicking on it your shape will show up on the map. In the Southern zone, map series are split into sixteen map areas, while in the Arctic and High Arctic zones, they are split into eight.

National Topographic System Maps

Please do not enter personal information such as your name, contact information, or identity numbers. National Forests and Grasslands produced maps Most offer online maps or instructions on how to obtain a printed map.

National Topographic Database

Maps at this scale are used by all levels of government and industry for a variety of uses including flood control, forest fire control, real estate planning, development of natural resources, environmental issues, right-of-way, highway planning, and depiction of crop areas. When you click on a link, the interface will switch to the Select clipping area section while a data extraction form is built to be presented to you in the Select options and submit job section. If you hover your mouse over the link you will see a description of the data product.
