Insect Conservation

The following table indicates the level of access a journal has as per Sherpa Romeo Archiving Policy.

Journal of Insect Conservation citation style [Update 2020]

Results will be downloaded and merged with bibliographic search results prior to deduplication where possible. Non-bee insects as visitors and pollinators of crops: biology, ecology and management.

Scientists warn humanity about worldwide insect decline

While several studies have documented declines in American populations of *Speyeria* due to habitat change, the response of Canadian populations of *Speyeria* to widespread anthropogenic pressures remains poorly unde.

Journal of Insect Conservation Impact Factor IF 2020

There is no doubt that many insects are in trouble. Of particular interest was the relatively high abundance of *Bombus terricola* Kirby 1837 found in many of the higher elevation collection sites and the single specimen documented of *Bombus fervidus* Fabricius 1798.
