The timing and structural evolution of the Donlin Creek gold deposit, southwest Alaska

...

Donlin Creek Gold Deposit, Alaska: Donlin Creek Gold Deposit

.

Trenching and sampling of the rhyolite mercury prospect, Kuskokwim River Basin, Alaska / by Raymond P. Maloney

The normal faults, and the older fold and thrust geometry is exploited by a ~ 71 Ma porphyritic dyke and sill swarm. The crystalline porphyry and the fine-grain porphyry are the most common igneous units on the property Piekenbrock and Petzel, 2002.

Rhyolite

The deposit was a high-grade gold-copper skarn with at least 131,500 ounces of gold Blumink, 2009.

Trenching and sampling of the rhyolite mercury prospect, Kuskokwim River Basin, Alaska / by Raymond P. Maloney

It was just like Wyoming, except much wetter, no roads anywhere, no cows, and a plethora of giant mosquitoes, such that if these large buggers were found in Wyoming, the Game and Fish Department would have opened a hunting season for them. . The Kuskokwim Group is intruded and overlain by Late Cretaceous to early Tertiary subduction related plutonic and volcanic rocks.

Mercury: Mineral information, data and localities.

Laser step-heating of illite in sample DC06-1280-2-AR produced a weighted mean plateau age of 71. .

Rhyolite
