Long Point Bird Observatory Sightings Board

Because it is the shallowest, it is also the warmest of the Great Lakes, and in 1999 this almost became a problem for two which require cool lake water to keep their reactors cool. Least Bittern — One was observed at the Tip October 6 SBC. During years one, three, and five, the collective data will be used to calculate lambda, the population growth rate, as described in King and Stanford 2009, pp.

People

Public access to land within the Long Point NWA, apart from the designated day use areas along the South Beach and east of Squires Ridge is prohibited and otherwise requires a permit under the Canada Wildlife Act from ECCC-CWS. The lighthouse property 6 ha is currently owned by Fisheries and Oceans Canada and the facilities are managed by the Canadian Coast Guard. Previous Federal Actions We classified the distinct population segment DPS of the subspecies, Lake Erie watersnake, that occurs on the U.

Long Point National Wildlife Area: management plan (proposed)

So while development is fairly evenly spread across three of the large islands, most projects reviewed since the Watersnake's listing did not cause loss of hibernation habitat.

Walleye in the Grand River, Ontario: an Overview of Rehabilitation Efforts, Their Effectiveness, and Implications for Eastern Lake Erie Fisheries

Irrespective of which population goal is used, 5,555 adult snakes or 6,100 adult snakes, both population goals have been met and exceeded for nine consecutive years 2002-2010 King and Stanford 2011, p.

Population Trends of Monarch Butterflies (Lepidoptera: Nymphalidae) Migrating From the Core of Canada's Eastern Breeding Population

Federal agencies would no longer be required to consult with us if any action they authorize, fund, or carry out may affect the Lake Erie Watersnake. These laws provide the Service the opportunity to review and comment on all projects affecting Lake Erie watersnake foraging

habitat, and many projects affecting shoreline habitat. Waterfowl movement is also quite impressive with thousands of Redhead flying over Old Cut daily and thousands of Scaup present on the Outer Bay.
