The productivity

Plant matter that's not eaten while the plant is alive can later be eaten by detritivores. Understanding the factors affecting or limiting primary productivity in grassland.

NPP Grassland: NPP Estimates from Biomass Dynamics for 31 Sites, 1948

We analyzed data from 72 global flux-tower sites partitioned into gross photosynthesis and ecosystem respiration with the use of the light-response method Gilmanov, T. The first puna site was located at approximately 3085 m a.

Regional response of grassland productivity to changing environment conditions influenced by limiting factors

Phosphate fertilisers, agriculture and the environment.

UKnowledge

WATER — Water is required by all living organisms. Beck HE, Zimmermann NE, McVicar TR, Vergopolan N, Berg A, Wood EF. Environmental contribution of grassland aboveground net primary productivity ANPP among different regions by canonical correspondence analysis.

Estimating net primary productivity from grassland biomass dynamics measurements, Global Change Biology

No fine root stock data are available for ESP.

Net Primary Productivity by Land Type

Eziz A, Yan Z, Tian D, Han W, Tang Z, Fang J.

Estimating net primary productivity of grasslands from field biomass measurements in temperate northern China

Numbers indicate locations of commonly used biodiversity metrics within the biodiversity space. There was a strong seasonal signal on grassland NPP AG and NPP BG, with a shift on allocation at the beginning of the austral summer. This variable is generated using remotely sensed net primary productivity NPP data and available grassland area, and entitled as grassland total NPP capacity.

UTIA researchers work to improve eastern grasslands

Site W unfenced areas were classified as Moderate grazing, and Site A unfenced areas as Low grazing intensity.
