### Difference Between Hawk and Falcon (With Table)

It can fly up to 200 miles per hour.

### Difference Between Hawk and Falcon (With Table)

He is a mechanical engineering graduate and New Jersey Resident. Distinguishing between hawks and falcons is a great practice for beginners because the two types of birds of prey are fairly easy to tell apart, so, efforts in this direction are almost certain to be rewarded, and these early

successes can spur first-timers on to more advanced activities.

#### **14 Major Difference Between Hawk And Falcon (With Comparison Table & Pictures)**

Diet Hawks are not specific about their diet and can eat anything that comes their way. Falcon wings are best for high speed stopping and diving so you will see fast, short but powerful flaps and speeds in excess of 100 miles per hour, and the peregrine falcon dives at speeds ranging from 180 to 200 miles per hour. First Difference: Wing Shape Instead of size, the easiest and most reliable way to easily tell whether a bird of prey in flight is a hawk or a falcon is the shape of its wings.
