God, Humanity and the Cosmos: A Companion to the Science

Climate Change - the challenge to the human project in the 21st Century; 17. Contributors include: Christopher Southgate John Hedley Brooke Celia Deane-Drummond Paul D. God, Humanity and the Cosmos, first published 1999, revised and expanded edition 2005, remains the only full-length textbook of the science-religion debate.

God, Humanity and the Cosmos: A Companion to the Science

Christopher Southgate and his seven editorial colleges have wonderfully filled this void with their outstanding textbook, God, Humanity and the Cosmos. It might also be challenging for students, as it introduces them to a variety of perspectives and a rich palette of literature. Among its unique characteristics, God, Humanity and the Cosmos presumes little background knowledge and yet it gives the reader reasonably easy access to the frontiers of the debates.

God, Humanity and the Cosmos, 3rd edition, A Textbook in Science and Religion

God, Humanity and the Cosmos: A Textbook in Science and Religion edited by Christopher Southgate Introductory Essay by Robert J. Each chapter includes brief questions that draw the reader into a deeper conversation with the text set in grayed boxes for easy identification. The final book considers areas of particular topical concern - how science and religion interact in secondary education, what issues are raised by 'the new

atheists', what particular issues are raised by science for Islamic thinking, what challenges are thrown up by the human use of technology, and specifically by climate change.

Introductory essay

Book Five points to future questions and issues in science and religion. Models of God in an Ecological Age; 9. The first covers overarching issues in the history of the science-religion interaction, the theology of creation and the philosophy of science.
