A fully searchable library of over 300,000 works of English and American literature. Sela, in Immunity in Viral and Rickettsial Diseases, ed.

**conference highlights include: Topics by Science.gov**

In order to further enhance the effectiveness of instructing practical skills in medical genetics, the emphasis of active learning modules in genetics curriculum at medical schools has increased in recent years. Differences in specialties' working practices and working with multiple healthcare organisations also brought challenges such as the 'genetic approach' of working with families, incompatible record systems and different approaches to health professionals' autonomous practice. Thereafter, the panel resolved conflicting recommendations and released a revised statement at the end of the conference.
