Feld's research in the area of high-energy physics and the expansion of nuclear science research at MIT is also reflected in the papers. A total of twenty-four individuals constitute the Committee: three Americans, three Soviets, five representatives from Third World nations, the two ex-secretary-generals, and the remainder from countries in Eastern and Western Europe. He contributed numerous articles to the journal, Bulletin of the Atomic Scientists, which was founded in 1946 to provide a forum in which members of the scientific community could discuss the social and political implications of their work.

Proceedings of the seventeenth Pugwash Conference on Science and World Affairs : scientists and world affairs, Ronneby, Sweden, September 3

The Neutron, Experimental Nuclear Physics, Vol. Washington Meeting of the American Physical Society, April 1979. Updating the Î»-excitation Quark Model for Baryon Resonances.

Collection: Bernard T. Feld papers

Readership: Graduate students in social sciences. In 1943 Feld left Chicago for Oak Ridge, Tennessee, to participate in the design and construction of experimental atomic pile and separation facilities.
