for tobacco cultivation,⁷ growers in the Kavala, Ikiye, and Salonica districts began to sell the bulk of their crops to export merchants. In 1905, for instance, about 88% of the tobacco sold there ultimately went to the depots of these merchants.⁸

Here, it is important to note that export merchants were not a homogeneous group. Some of them had considerable capital at their disposal, engaged in buying and selling tobacco leaves on a large scale. They established companies and employed small-scale merchants as their agents. The Alattini family of Salonica was among such prominent merchants. The family was engaged in the tobacco business by the mid-nineteenth century and dominated the export trade from Macedonia until the mid-1880s.⁹

⁷In the district of Kavala, the amount of land devoted to tobacco had increased by 42% between 1904 and 1912. Basil C. Gounaris, *Steam over Macedonia, 1870-1912: Socio-Economic Change and the Railway Factor* (Boulder: East European Monographs, 1993), 124.
