## Warsaw Pact

In allocating the fighter-bombers between the first and second waves, the first wave probably would get preference. Apparently this has led Pact planners to assign the primary strike role in the conventional Air Operation to the medium bombers of the Ira. Frontal Aviation fighter units would protect the medium bombers and fighter-bombers in their flights over Pact territory and through NATO air defenses during the Air Operation.

## Warsaw Pact

Rather, these aircraft would pass through the corridors where defenses would be at least suppressed by the first wave. Remembering the of 7 Arab-Israeli war, they hold that the initial achievement of air superiority by enemy aircraft on the ground can quickly decide the outcome conventional war.

## The Warsaw Pact Command Structure in Peace and War

The third wave, comprised of LRA medium bombers, would attack targets throughout the theater. The command and control procedures established in this military alliance would serve as the model on which the Soviet Union would build the Warsaw Pact after 1955.

## WARSAW PACT AIR POWER: CONCEPTS FOR CONVENTIONAL AIR OPERATIONS AGAINST NATO (S)

Here again Soviet commanders looked to history, particularly the Great Patriotic War, and those lessons indicated Russian arms suffered most when on the defensive.

## The Warsaw Pact Facts & Information

Air defense units probably could best be in the second wave of the Frontal Aviation attacks against targets behind the forward air belt.

## **The War That Never Was: NATO vs The Warsaw Pact**

Ground force antiaircraft resources have been improved with the issuance of self-propelled guns, the 'i andobile missiles, and the SA-7missile. Second-strike groups are not intended to engage the ground-based air defense sites in the immediate border areas.

### **Warsaw Pact**

During the first three days of the exercise, LRA medium bombers flew moreorties,simulating the initial Air Operation. Interestingly enough, that same tank force illustrates the third way in which the Soviet military shaped its armies to maximize the power of pure numbers, and that was by compromising the quality of each individual piece of equipment. The priority assigned to reducing NATO nuclear capabilities during the conventional Air Operation reflects the Soviet conviction that conventional conflict will onlyrelude nuclear war-Pact expectations as to the duration of thephase are imprecise.
