## Nursing Final Exam Flashcards

**PRESIDENT AND GENTLEMEN OF THE HISTORICAL SOCIETY :** Although I appear before you at the season at which the various religious, moral, and philanthropic societies usually hold their annual meetings to discuss the stirring and controverted topics of the day, I need not say to you that the proprieties of this occasion require me to abstain from such subjects; and to select a theme falling, to some extent at least, within the province of an historical society.

All maggots must be removed with tweezers.

## 2017 Infectious Diseases Society of America Clinical Practice Guidelines for the Diagnosis and Management of Infectious Diarrhea

Pepper in general can irritate your dog. Nests are often constructed on lawns, disfiguring them and interfering with mowing.

Crates can be soft sided or plastic and hard sided if you and your dog prefer, but I like the collapsible metal crates with a removable pan that I can move around the house, easily clean, and modify in size as the dog grows. Parasites can live in your dog's feces for a few days after elimination and can possibly reinfect your dog or infect members of your household if not properly disposed of.

## **INTERNAL PARASITES OF POULTRY**

Epinotal spines rather close together basally, each rather long and with acute apex.
