## List of states and union territories of India by fertility rate

These respondents parents also had less education primary education and less exposure. This reflects that not only do gender attitudes influence the perception of young married people among tribals for early child bearing but they also impact the planning of a child within one year of marriage. A group of 10 farmers who have compact land up to a minimum of 5 acres form a Udyam Vikash Samiti UVS The concept behind forming these organisations is to assure better aftercare activities, and marketing.

## Fertility rate below replacement level for all but Hindus & Muslims

Educated and rich person are morally and physically handicap and poors are the active agent of development in India Vivekanand. At national level, these diseases were high prevalence among the male and female in the rural areas.

## Fertility and mortality differentials among selected tribal population groups of north

This paper will analyze the status of women among the scheduled tribes in India.

## Fertility and mortality differentials among selected tribal population groups of north

Today under the influence of modern day society, these tribes of Rajasthan also take up religions like Buddhism, Islam, Christianity, Parsi religion. In India, a large proportion of the population is poor and cannot afford the high tech medical treatment of the private hospital. Women have very little autonomy; first under the control of their fathers, then of their husbands and finally of their sons.
