## **Economic liberalism and its rivals : the formation of international institutions among the post**

His award-winning first book, *Economic Liberalism and Its Rivals* Cambridge University Press, 2009 explored the formation of international economic institutions among the post-Soviet states, and explained why countries chose to join the Eurasian Customs Union, the WTO, or to eschew participation in any trade institutions. Drawing on a detailed study of the fifteen post-Soviet states in their first decade of independence, interviews with key decision-makers and the use of closed ministerial archives, the book explores how the changing ideas of state officials led countries to follow one of three institutional paths: rapid entry into the World Trade Organization, participation in a regional Customs Union based

on their prior Soviet ties, or autarky and economic closure.
