Sustainability in Water Supply

In addition, global food production is expected to increase by 60% from 2000 to 2030, creating a 14% increase in water demand for irrigation UN, 2005. A BMAP also identifies strategies to address the pollutant reductions required to achieve the TMDL.

Supervisory Management in the Water/Wastewater Field

For example, a work place is usually inappropriate for a person to share his marital problems. Greywater comes from domestic activities such as washing, whereas blackwater contains human waste. Certain records that FDACS receives from producers are considered confidential and may be exempt from public records under chapters 812 and 815, Florida Statutes F.

Moisture Management of Textiles

Tailor made fabrics can be made to suit the specific end-use requirements. By 2050, world agriculture will need to produce 60% more food globally, and 100% more in developing countries. Some projects include energy performance benchmarking, 50:50 cost shares for energy assessments by pre-qualified consultants, and the installation of sub-metering equipment to determine the energy consumption of the various processes within the facility.

Moisture Management of Textiles

WONG, AND WEILIN XU, Moisture Management Tester: A Method to Characterize Fabric Liquid Moisture Management Properties, Textile Res.

Water and sustainable development

By incorporating energy efficiency practices into their water and wastewater plants, municipalities and utilities can save 15 to 30 percent, saving thousands of dollars with payback periods of only a few months to a few years.

Water Utility Training Courses

From an ecological perspective, sustainable development efforts have not been successful.

Agricultural Best Management Practices / Water / Agriculture Industry / Home

Diffusion through individual fibres: Depending on the hydrophobic or hydrophilic nature of the fibres, the water vapour is absorbed into the fibres at the inner surface of the fabric, diffused through the fibre structure and desorbed at the outer surface.
