'The rock'

By contrast other eastern Chalukyan Temples, like the , five kilometres from , and the Swarga Brahma temple at Alampur show a greater assimilation of northern styles from Odisha and Rajasthan. During recent decades, to meet the requirements of larger gatherings, bigger and better ventilated assembly halls, with the sanctum at one end, have become accepted style.

Essays in Early Indian Architecture

Beyond these basic but crucial similarities, the visible stylistic forms of the temple vary greatly and have a very complicated development.

This represents the main contribution of the region to. Interiors are more lavishly decorated, with elaborate carving on most surfaces. The in Calcutta is the most effective symbolism of British Empire.

Monuments, Motifs, Myths: Architecture and its Transformations in Early India and Southeast Asia

After collapse of mature harappan urban period, some cities still remained urban and inhabited. Over this holiest area, at the innermost end of the mass, rises the spire with its four recessed terraces and its crowning stupika, a much enlarged version of the spires of the vihara Raths at Mahabalipuram.

Essays in Early Indian Architecture

It shows how as apparently in all rock-cut constructions the work was begun at the highest point. Furthermore, the free-standing railings round the stupas or holy mounds of earth that represent enlarged tumuli, were translated directly from wood to stone before the second century B.
