However, the rough embryonic connections still require postnatal visual experience for fully functional visual circuits to develop Katz and Shatz, 1996. In other words, I'm mostly heterosexual, but not completely, equally attracted to both sexes, mostly but not completely attracted to the same sex, or only same-sex-- exclusively gay, exclusively same-sex attracted. Although rearing as a female is not always sufficient to produce female gender identity Diamond and Sigmundson, 1997; Wilson, 1999 , in some cases it may be Bradley et al.

Consumption Patterns of Male and Female Headed Households in Pakistan: Evidence from PSLM 2007

For boys, they're much more likely to adopt an exclusively gay pattern than to leave it.

The advent of newer brain imaging technologies should now provide more information on the underlying neural substrate of a range of observed sex differences in cognitive function.

Are Men's and Women's Sexual Minds Really That Different?

Women's desire tends to be more context-dependent. And actually the best way to get a sense of how much more common bisexual attractions are than exclusive attractions is to superimpose them.

Sex Affects Behavior and Perception

Even though menstrual cycles can seem to be regular in young women, young women have higher incidences of anovulatory cycles and lower levels of ovarian output than women in their 20s and beyond. Some antecedents and consequents of masculine sex-typing in adolescent boys. I can't
