Can solar variations explain variations in the Earth's climate?

Now we have multi-millionaires, celebrities, and washed up politicians flying around the world in their private jets telling us to cut back and drive a smaller cars to save the planet. Although they contain a great deal of information about major climatic shifts that occurred following the last ice age, the evidence of cycles is far less convincing.

Burroughs, William James [WorldCat Identities]

Vegetation reflects a greater proportion of near-infrared light than visible red light, but bare soils or little vegetation will have similar reflectances in both bands.
