## Medical Education in America

They are underpinned by a series of cross-cutting thematic programmes of activity, which are also set out below.

### Benjamin Rush and the State of Medicine in 1803

Chauliac is particularly emphatic in his insistence on not permitting alimentary materials to remain in the cavities, and suggests that if cavities between the teeth tend to retain food material they should even be filled in such a way as to prevent these accumulations. Also, Guy de Chauliac, in the 14th century, describes the method as it was used in his day.

### The Daily Mile makes primary school children more active, less sedentary and improves their fitness and body composition: a quasi

With regard to lack of accountability to patients the evidence that long working hours and fatigue can lead to errors of judgment and concentration is strong in the scientific literature and is one of the factors which led to limiting resident duty hours.

### Greek myths: A continuing influence on modern life

Compounding this is the fact that within the hospital system, patients are cared for by hospitalists they have never seen before, often working eight to twelve hour shifts, so that the patient may have three different physicians in a 24 hour period. These influences can be seen in the current workforce data, as gender differences in part-time working appear to increase as doctors move up the career ladder. An interesting opinion piece written by a group of faculty clearly passionate about the subject.

### The influence of Herman Boerhaave.

One instance was the connection with the parish of Lochs in Lewis, where the parish minister fostered the link through speaking to his parishioners and writing references for those seeking work in Patagonia. It is possible to compile a very long list of these Scots words and phrases.

## **Medical Education in America**

No applicant for instruction who could pay his fees or sign his note was turned down. These methods were frequently opposed by the Church as they represented a threat to the religious messages they preached and to the formal medical licences that were issued by the Church to university-trained doctors.
