## Poisoning: First aid

Medical records were reviewed to abstract details missing from poison center call records.

## Poisoning: First aid

Some studies have found additive effects from other medications such as some antidepressants Bone et al. In mild lithium toxicity, symptoms include weakness, worsening tremor, mild ataxia, poor concentration and diarrhea. The most important risk factors for lithium-induced hypothyroidism are the presence of antithyroid antibodies, which increases the risk by eightfold Bocchetta et al.

## Serious Adverse Health Events, Including Death, Associated with Ingesting Alcohol

Vitamin K is required for the synthesis of important substances including , which is involved in. At times, lithium tremor seems to improve spontaneously after years of treatment.
