I am leaving with ideas and eager to implement them in my classroom. For many of them, unfortunately, multicultural education is only about heroes, holidays, ethnic foods, and cultural attire, and devoid of serious discussions of race and class-based inequities... I highly suggest this book for beginning and advanced multicultural educators, schoolteachers, and college professors across disciplines, as well as activists and intellectuals outside of formal educational institutions. The process builds a sense of empowerment and teaches children to be critical thinkers about their world.

It offers insight into how the traditional American educational system perpetuates racism in all curricular areas. It provides a rich array of resources, models and strategies for promoting multicultural education.
