### Swans Commentary: Lester R. Brown's B: Rescuing a Planet under Stress and a Civilization in by John Blunt

As aquifers are depleted and wells go dry, refugees already are escaping drifting sand in Nigeria, Iran and China, and we now face the potential wholesale evacuation of cities. Vast food supplies are generated in these areas, supporting whole continental populations.

### Swans Commentary: Lester R. Brown's B: Rescuing a Planet under Stress and a Civilization in by John Blunt

Thus far, most of the environmental damage has been locally confined: the death of the Aral Sea, the burning rain forests of Indonesia, the collapse of the Canadian cod fishery, the melting of the glaciers that supply Andean cities with water, the dust bowl forming in northwestern China and the depletion of the U. The demand to better wellness affects poverty in a assortment and wide stretch ways. The US plans that provide school tiffins every bit good as plans to pregnant adult females and kids are used as illustrations that could be duplicated in other states.

### Lester R. Brown, Plan B—Rescuing a Planet under Stress and a Civilization in Trouble, The Environmentalist

Would be good to read with a group or a class. On larger scales, for instance, if real costs were fixed to more global resources, like Colorado River irrigation water, which is relatively free , then rice farming in Nevada would be transferred to regions that can naturally sustain them. This is not a complex technology.

### Plan B: Rescuing a Planet Under Stress and a Civilization in Trouble

The book is well worth reading.

### NOVA

Overpumping is a short-term solution that creates a dangerously deceptive illusion of food security — it supports a growing population while

almost ensuring a future drop in food production. Land productivity falls with loss of soil. In the last four years, world grain production has fallen short of consumption.

#### **PLAN B: Rescuing a Planet under Stress and a Civilization in Trouble**

Brown, Plan B—Rescuing a Planet under Stress and a Civilization in Trouble W. This would involve no change in the number of cars or miles driven, only a shift to the most efficient automotive propulsion technology now available. China became a net oil importer seven years ago, and its imports have been growing very rapidly since then and are projected to keep growing at an extraordinary rate.
