## The *hansrieberi* biohorizon (Aalenian; Opalinum Zone) in the Opalinuston Formation of Donzdorf

Upper Aalenian, Concavum Zone; Germany.

## Geochemische, sedimentologische und ökologische Untersuchungen im Brauner Jura alpha (Opalinuston) der Schwäbischen Alb

Greatest height at anterior cardinal angle; greatest length above mid-height. Lower Aalenian, Opalinum Zone; SW Germany.

### 1. Introduction and previous studies

Below this massive bed grey, fine-sandy siltstones may occur. The fauna is a mixture of *Brasilia* spp.

## The *hansrieberi* biohorizon (Aalenian; Opalinum Zone) in the Opalinuston Formation of Donzdorf

Similarly, northeast of the road K 1429 connecting Bad Boll and Gruibingen, the Riesbach creek cuts the Opalinuston Formation. Dorsal margin slightly concave in the right valve, slightly convex in the left one. The integrative study of ammonite and ostracod faunas allows an excellent combination of both stratigraphic lines of evidence.

### Search Results

Louisiana State University Press, Baton Rouge, 536 pp. Right and left valve identical in outline and ornamentation : Anterior margin symmetrically rounded.

Comunicações dos Serviços Geológicos de Portugal 73: 103—144.

**LGRB**

The eye-tubercle is fused with a short, indistinct frontal rib.

**Geochemische, sedimentologische und ökologische Untersuchungen im Brauner Jura alpha (Opalinuston) der Schwäbischen Alb : mit 14 Tab.**

Of 34 species appearing here for the first time, the following ones are somewhat more common and useful for stratigraphic purposes in the order of their first occurrence in this section : *Eocytheridea lacunosa*, *Plumhofficythere clavatooides*, *Kinkelinella Kink.*
