In Ashanti, towns along the lines to Kumasi, like Ejisu and Konongo, were connected. The dam created a hydroelectric power plant, which fueled an aluminum smelter and provided electricity to urban centers and adjacent countries. When the power finally arrived, there were not enough meters, a frequent problem in rural electrification.

Darkness has been replaced by light. The World Factbook provides information on the history, people and society, government, economy, energy, geography, communications, transportation, military, and transnational issues for world entities. Although Akosombo had an installed capacity of

912 MW, this enormous power potential was not fully used, due to a lack of load demand and due to high equipment and construction cost hindering grid expansion.

The Akosombo Dam was the product of U.

**Publications Report Status Road Safety**

This makes the use of electric power here very unsafe and non-profitable.
