Grade 7, Unit 1

A good 20 meter tape measure might have an error of 0. Explain or show your reasoning. What is the distance between the corresponding points on Figure 2? Lesson 9 The Empire State Building in New York City is about 1,450 feet high including the antenna at the top and 400 feet wide.

OpenStax College Physics Solution, Chapter 1, Problem 12 (Problems & Exercises)

Figure B is a scaled copy of Figure A. A map of the local park is made with the scale 1 inch to 200 feet.

OpenStax College Physics Solution, Chapter 1, Problem 12 (Problems & Exercises)

Consider using colored pencils to highlight corresponding parts or labeling some of the vertices.

OpenStax College Physics Solution, Chapter 1, Problem 12 (Problems & Exercises)

I, to the nearest meter A local park is in the shape of a square. Here are some scale drawings that show the top, side, and front views of the Lysander.

Grade 7, Unit 1

This is College Physics Answers with Shaun Dychko. Select a scale that you think is the most appropriate for the scale drawing. And so when we do this calculation, we need to make sure the units on the top and bottom are the same so this centimeters has to be converted into meters by multiplying by 1 meter for every 100 centimeters and the centimeters cancel leaving us with meters and then this works out to 0.

Grade 7, Unit 1

Now we do have two significant figures in our percent uncertainty; you never have more than that because it is an uncertainty after all and you can't really be very precise about your uncertainty so either one or two significant figures is appropriate. The Westland Lysander was an aircraft used by the Royal Air Force in the 1930s. .
