## Evaluation of the Patient with Muscle Weakness

The form is completed for initial patient encounters during formal one-on-one mentorship sessions between the fellow-in-training mentee and the fellowship-trained faculty mentor and during subsequent encounters to reflect on initial hypothesis formation and decision making.

## Essentials of Medical Screening and Differential Diagnosis in Physical Therapy: When Do We Wave the Red Flag?

Updated neurology and surgery sections provide the most current, evidence-based practice parameters.

## Differential Diagnosis for Physical Therapists by Goodman Books, Book Comparison at 130 bookstores

Revised appendices discuss the latest concepts in documentation standards, palliative care, and patient safety. The muscle biopsy can be accomplished as an outpatient procedure and carries the attendant risks of pain, bleeding, infection, and sensory loss.

## Differential Diagnosis in a Patient Presenting With Both Systemic and Neuromusculoskeletal Pathology: Resident's Case Problem

The infectious disease chapter has been revised to reflect its increasing importance in clinical medicine, the emergence of multi-drug resistant bacteria, and the threat of bioterrorism.
