What are Investment Criteria?

One obvious objection which can be made to the method of calculating the aggregate capital requirements of the LDCs on the basis of a stable overall capital-output ratio is that this implies the assumption of constant returns to scale for the expansion of the economy as a whole. A principal criticism of the use of both these ratios is that they ignore the existence of other factors of production, such as natural resources.

Criteria for Investment in Developing Economy

The Marginal Growth Contribution: Eckstein has successfully reconciled the conflict between the Kahn-Chenery SMP approach and the Galenson-Leibenstein reinvestment approach, and, in so doing, he has provided a considerable generalisation of each. There are various recipients of income generated by a project having differing marginal propensities to save.

URBAN TRANSPORT INVESTMENT CRITERIA FOR DEVELOPING COUNTRIES

In this way the allocation procedure can be divided into two steps: ADVERTISEMENTS: i. Buchanan was among the first to state this criterion for investment in LDCs to base policy recommendations upon it.

Investment Policy and Promotion

If the savings ratio is not related to the form of income generated, then, as Bator shows, there is no conflict between maximising income in the short run and in the long-run. Is a high FDI share a sign of weakness? If the nation goes on postponing that then in practice, it will be postponing self-sufficiency. It does not however guarantee that feasible investment projects will be made in reality.

Investment Fund for Developing Countries

Likewise, because a significant portion of FDI is intercompany debt, the parent company can quickly recall it. Marginal Productivity Criteria : A more comprehensive allocation criterion is the social marginal product of a given unit of resources in a given use.

Public investment in developing countries: A blessing or a curse?

ADVERTISEMENTS: This ratio helps in finding out the productivity of capital in various sectors of economy at a given point of time.

Investment Fund for Developing Countries

But this barely scratches the surface of the problem of testing the consistency of an integrated economic development plan. But this is a simple property of geometric growth. Much time is also not needed for their completion and nation begins to reap the fruit after sometime.
