### Traditional, Complementary And Alternative Medicine: Policy And Public Health Perspectives

Three of the eight objectives in this declaration pertain to health matters. The House of Lords Committee on Complementary Medicine in Great Britain recommended that self-regulation be a cornerstone for the formalization of the complementary professions. The right to health can be defined as an economic, social, and cultural right guaranteed by national and international legal instruments to ensure each individual the conservation of better health through actions aimed at improving social, political, and economic conditions of individuals and communities and a better functioning of the health care delivery system.

### Traditional, Complementary, Alternative, and Integrative Medicine (TCAIM)

Health care can broadly be divided into modern conventional, orthodox, Western or allopathic and traditional indigenous, complementary, alternative or integrative.
