. Following atlas adjustment, Sarapin, an inexpensive distillate of the pitcher plant, can be injected into trigger points, with or without admixed local anesthetic agents, to release trigger points or taut bands, thus lengthening muscles and reducing strain on tendons. Atlas was a member of the National Medical Honor Society.

## Library of Spine Surgery Operations

Visit our to call your preferred clinic location directly and speak with a member of our staff. I agree to the use and processing of my personal information for this purpose. Sarapin is an FDA-approved sterile solution of the soluble salts obtained from the botanical pitcher plant Sarracenia purpurea.
