Development, Strategies, Type, Application, Leading Countries AND Forecast By 2021

The scale of production is small, scattered, and mainly household endeavors. Since 2007, fisheries are shifting from demersal fisheries bottom trawls, bottom gillnet to pelagic fisheries floating gillnet, purse seine, lift net in the Gulf of Tonkin, the central and the southwest waters.

Fisheries Country Profile: Viet Nam

Smaller vessels use a wide variety of fishing gears including gillnets, falling nets, traps, and hook and lines, while the main fishing gears used by commercial fishing vessels are bottom trawls, purse seines, and falling nets Figure 5. The country has a long coastline of 3,260 km and the waters abound with 2,038 species of marine fishes of which about 130 species have commercial value, and 30 species are regularly exploited by capture

fisheries.
