## The Intelligibility of Nature: How Science Makes Sense of the World by Peter Dear

I would like to thank Joshua Cohen for drawing my attention to this area of cognitive research. Sometimes a foreign language makes you do a double take. Our experience of perceptual unity... suggests that the brain in some way binds... all those neurons actively responding to different aspects of a perceived object.

## problem of moral responsibility

The comfort and authority we once received from the deity we now find in a priori metaphysics and deductive logic.

## **epistemology**

By controlling the different parts of the speech apparatus, the airstream can be manipulated to produce different speech sounds. Generation by generation, pronunciations evolve, new words are borrowed or invented, the meaning of old words drifts, and morphology develops or decays. I can hear Crispin Sartwell complaining along these lines right now.
