Seyi

The questionnaire was pretested among 30 women presenting at the Medical Outpatient clinic of the UCH. The courses offered were from the Department of Adult Education, the Department of Guidance and Counseling and the Department Teacher Education. Socio-demographic

characteristics of patients A total of 360 out of the 380 eligible patients approached for participation in the study gave consent and completed the study, thus, a response rate of 94.

The pattern of somatization symptoms at the Ibadan Teaching Hospital Psychiatric Clinic

Of this number, 74 35. Schueler KM, Chu PW, Smith-Bindman R: Factors associated with mammography utilization: a systematic quantitative review of the literature. This is an interesting finding which underscores the need for more community based interventions on breast cancer awareness.

The Impact of Leadership Styles of Principals and Teachers of Secondary Schools in Kaduna State Nigeria: Using School Environment as a Tool for School Achievement

All authors read and approved the manuscript. Worthy of note to mention is the fact that the two physicians who participated in this study were among those who had adequate knowledge of ADRs as well as pharmacovigilance awareness. It was reasoned that the cost of maintaining the Institute should be borne by the Federal Government outside the normal university budget.
