Making It Explicit: Reasoning, Representing, and Discursive Commitment.

### Primate Behavior

For example, Valerie Thompson finds that the feeling of rightness of an initial answer predicts both response time and likelihood of switching from the original answer Thompson et al.

### Primates

Because there are numerous ways to implement enrichment programs for nonhuman primates and because assessment depends on how they are implemented, we and others e. In the context of animal cognition research, cognition research usually focuses on questions about the mechanisms involved in specific capacities, such as learning, memory, perception, or decision-making. In a well-known set of experiments, Thorndike placed cats in a variety of puzzle boxes, and observed the strategies the cats used to escape.
