2014 Vol

Intonationality phonology of Estonian statements with low level nuclei. If the native category corresponds fairly well to one of the second-language categories, then discrimination may be assisted by a difference in category goodness between the two second-language sounds. On prosodic phrasing in Swedish.

Auditory Analysis and Perception of Speech

Hanamura K, Tojo A, Fujita T. The data came from a variety of clinical, descriptive, cross-sectional studies of variously defined groups of military personnel.

心智模擬計算及人工智慧

In Fox MW, editor: Abnormal behavior in animals, Philadelphia, 1968, WB Saunders. Associate Professor Eisei Noiri, M.

2014 Vol

For very quiet partials of quasiharmonic sounds, the frequency of the nearest harmonic suitably scaled is used for interpolation. Overall KL: Part 3: A rational approach: recognition, diagnosis, and management of obsessive-compulsive disorders, Canine Pract 17 4 :39, 1992. Indeed, the concept is widely accepted and has proven to be very useful.

Speech processing in the auditory system I: The representation of speech sounds in the responses of the auditory nerve

Voice analysis in depressed patients: Rate of change of fundamental frequency related to mental state.
