This presents the reader with two kinds of problem. I found that my reaction to it was the same as my reaction to most non-historical ancient texts; some of it was brilliant, some of it was a fascinating look at where our ideas came from, but most of it was deadly boring. Are we to say that these properties have always existed? The natural sciences are oriented to developing a technical knowledge useful for controlling and manipulating the natural world to serve human needs.

Chapter 1. An Introduction to Sociology

If, as was noted above, the dispositionalist thinks of natural laws as being entirely determined by the dispositional properties or causal powers which the world instantiates, the actual dispositional properties instantiated in the world cannot also determine possibilities which run counter to those laws.

Chapter 1. An Introduction to Sociology

Nevertheless, they both thought that society could be studied using the same scientific methods utilized in the natural sciences. She recognized from the consciousness-raising exercises and encounter groups initiated by feminists in the 1960s and 1970s that many of the immediate concerns expressed by women about their personal lives had a commonality of themes.
