## Amtrak On

The train departs Palm Springs at 2:02 AM and arrives in Los Angeles at 5:35 AM. On their own, the airline scheduled me to depart from Los Angeles rather than Palm Springs.

## How to Check Your Train Status

. On the day of the week that I need to arrive, over 50% of the arrivals would have resulted in my missing my flight. But then I had an idea.

### NTSB: Rear Train Was Going 30 MPH In 10 MPH Zone At Time Of Green Line Crash

A Green Line train involved in a crash with another train car. A train might or might not have a stoppage halt at the Intermediate stations mentioned in the list.

## How to Check Your Train Status

It made sure that no two trains from the same or opposite direction reached a platform at the same time. In 2010, WBZ-TV took a radar gun to the area, and routinely found trains going two or three times faster than the 10 MPH speed limit. The downside is that my original flight had just one layover - whereas the only flights now available have two layovers.
