French in Action : A Beginning Course in Language and Culture

It is a language unto itself, and therefore must be understood in its own context. Pierre Capretz understood that language learning requires an immersion experience. Pages and cover are clean and intact.

The new edition also incorporates more content about the entire Francophone world. The video section is broadcast year round on PBS channels, as well as available online at the learner website. Because most of the lessons involve some kind of conversational practice, the course is best taken with a partner or the help of a tutor.

French in Action : A Beginning Course in Language and Culture

The third edition has been revised by Pierre Capretz and Barry Lydgate and includes new, contemporary illustrations throughout and more-relevant information for today's students in the Documents sections of each lesson. I've tried a number of different language course in a number of different languages over the years, but this is far and away the best. Since it was first published, French in Action: A Beginning Course in Language

and Culture—The Capretz Method has been widely recognized in the field as a model for video-based foreign-language instructional materials.

French in Action : A Beginning Course in Language and Culture

The genius behind French in Action is that you learn in a virtually 100% French environment from the very beginning, so you are not thinking in English, but in French, from the start. The course utilizes an immersion method, meaning that after the first couple of lessons, everything except the study guide is in French.

French in Action

Watch the video for each chapter first, then listen to the first track on the audio program for the chapter, then complete the workbook assignments in order the workbook will point you to the appropriate sections of the audio programs and the textbook. Don't expect a standard presentation, because the material isn't handled anything like standard French textbooks. The reason to use all four components is that, by the end of each chapter, you will have seen videos , heard videos and audio programs , said audio programs , read textbook , and written workbook the words you are learning.

French in Action is a model for video-based language instruction, and the new edition updates the text and workbook for today's students. Immersion is the key here: immediately, you must pay attention to the language as a whole, just like when you were a kid learning English. The course would be nearly ideal for a college-level student with at least a year of high school French under their belt.
