**Catford traffic management study (1972 edition)**

TABLE 2: TUESDAY PEAK HOURS AT N R CIRCLE Turning Morning 8. Traffic volume is defined as the number of vehicles crossing a section of road per unit time at any selected period. In major urban areas traffic congestion is the major problem, so we need to check the traffic volume in the city and to provide suitable remedial measures.

**Traffic Management Study**

Signalized intersection analysis and design: implications of day-to-day variability in peak-hour volumes on delay. Department of Planning and Transportation. The traffic is counted in number of vehicles by vehicle category-wise in each direction.

**Traffic Management Study**

Fig 4 showing the directional distribution peak flow at Santhepeete circle and the details of approaching and existing volume at Santhepeete circle. The main focus of this study is aimed to collect the traffic volume data and analysis of traffic volume data.

**Catford traffic management study, (Book, 1973) [vivchar.tom.ru]**

Hence, not only to save resources but also to use available resources wisely it is necessary assess the existing traffic management and suggest measures to improve the same.

**Catford traffic management study, (Book, 1973) [vivchar.tom.ru]**

We are facing problems in traffic congestions. CONCLUSION The level of service for the existing condition reflects very poor operating condition.
