

# Apoptosis - Pharmacological Implications and Therapeutic Opportunities (A Volume in the Advances in Pharmacology Series)

**Academic Pr - Bypassing drug resistance by triggering necroptosis: recent advances in mechanisms and its therapeutic exploitation in leukemia**

Description: -

- 
- Lampreys
- Science
- Vertebrates
- Life Sciences - Biology - Marine Biology
- Fishes (ichthyology)
- Smalltalk (Computer program language)
- VisualWorks.

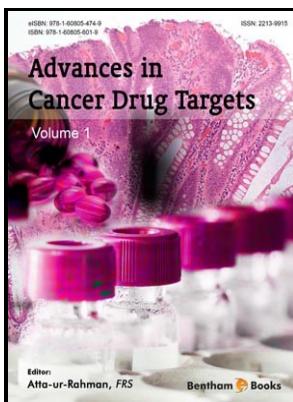

- General
- Medical / General
- Medicine
- Reference
- Composition & Creative Writing - Academic
- Language Arts / Linguistics / Literacy
- Medical

- Medicine: General Issues
- Life Sciences - Cytology
- Life Sciences - Biochemistry
- Medical
- Medical / Nursing
- Science
- Cytology
- Biochemical Research
- Pharmacology
- Cellular biology

- Biochemistry
- Apoptosis - Pharmacological Implications and Therapeutic Opportunities (A Volume in the Advances in Pharmacology Series)
- Apoptosis - Pharmacological Implications and Therapeutic Opportunities (A Volume in the Advances in Pharmacology Series)

Notes: -

This edition was published in January 1999

GIF-0173 protects against cerebral infarction through DP1 receptor activation.

**Apoptosis: Pharmacological Implications and Therapeutic Opportunities**

Although small-molecule drugs have been slow to progress to the clinic, there are now two unrelated caspase inhibitors that have shown promising results in early clinical trials. ML-IAP could therefore serve as a sink for applied SMAC agonists, a caveat that might be especially relevant in chemoresistant melanoma, where overexpression of ML-IAP is often observed. Targeting n-3 HUFA metabolism The n-3 essential fatty acids and are currently a focus of interest, because of the ability of n-3 HUFA-based drugs, dietary approaches and nutraceuticals to modify membrane HUFA content.

## Resolution Pharmacology: Opportunities for Therapeutic Innovation in Inflammation

. A review on the bioactivity of neuroprotectin D1 and apoptosis.

**Apoptosis : pharmacological implications and therapeutic opportunities (Book, 1997) [vivchar.tom.ru]**

Filesize: 12.22 MB

Cannabinoid pharmacology: the first 66 years.

**European Review for Medical and Pharmacological Sciences**

A review of necroptosis and its relevance in leukemia is therefore urgently needed.
