## Anacampseros telephiastrum

Both have beautifully scented large white jasmine flowers with a pink reverse from August to November. Fertilization: Feed with a high potassium fertilizer in summer during the growing season diluted to one-fourth potency and mix into the watering can for application.

## Van Stadens Wild Flower Reserve, Eastern Cape

A of fynbos in the section of the Cape Fold Mountains about 18 months after a fire.

## Types of Veld

The term, in its pre-Afrikaans, Dutch form, fynbosch, was recorded by Noble as being in casual use in the late 19th century.

## Veld

They are popularly called heaths and are generally smaller plants bearing many small, tubular or globular flowers and leaves. Between August and September, the wildflowers here are unbeatable. South Africa's Western Cape has the vast majority of species with one estimate finding 8,550 species in 89,000 km<sup>2</sup>, which is higher than that estimated for the Malayan forests, 7,900 species in 132,000 km<sup>2</sup>.

## Anacampseros telephiastrum

The soil must be cultivated to achieve an as favourable as possible seedbed.

## Wild Flowers of the Eastern Cape Province

She teaches about indigenous edible foods through immersive experiences, connection and creativity. Both forms flower profusely for a few months from autumn to spring. Because the higher and wetter areas are more protected and contain important water sources, the original flora is more intact than in the lowlands; but agriculture and global warming are still threats.
