Reoperative Transaxillary Approach Algorithm: Extending the Surgical Alternatives for Secondary Breast Augmentation in the Era of Scarless Surgery

Colen has been mentioned in innumerable

articles in popular publications throughout the time of her practice: i. Conclusion While DIEP flap surgery for breast reconstruction provides favorable results, patients frequently require additional procedures to improve aesthetic outcomes. Preoperative saline deflation and 3D analyses are useful for preoperative planning in reoperative breast surgery.

Reoperative Plastic Surgery of the Breast

June 3-5, 1993: Manhattan Eye, Ear and Throat Hospital Symposium Aesthetic and Reconstructive Surgery of the Breast and Body — New York, NY 54. Mendieta, an acknowledged expert in this. Currently she is Clinical Associate Professor Plastic Surgery in the NYU School of Medicine, department of Surgery she is also an Attending Physician in Plastic Surgery at Manhattan Eye Ear and Throat Hospital, Lenox Hill Hospital and at the New York Eye and Ear Infirmary in NY.

Reoperative Aesthetic and Reconstruct...

. For this reason, we chose to calculate volumes with the Analysis program as opposed to the Sculptor program, which is the program used to generate breast measurements and select implants in augmentation patients. If the patient has chosen an implant larger than 250 mL, placement in the subglandular plane risks implant edge palpability, and it is our preference to place the implant in the submuscular plane.

Reoperative Aesthetic and Reconstructive Plastic Surgery

During this second consultation, patients will discuss the procedure again, as well as the risks, benefits, and expectations. Unlike the Sculptor measurement of volume, the Analysis program extrapolates chest and abdominal wall irregularities and subtracts its volume from the breast volume.

Filesize: 66.910 MB

This volume aids determination of the final implant size.
