Painters, Painting, Training, Events, Licensing

You can either buy spray fabric paint or add a special additive to paint which will make your paint to sprayable consistency if you want a professional effect. Drawing on the combined talents of our experienced team of master craftspeople, we take pride in finding solutions that honor creative design—while meeting schedules and working within budget. Google for dot mandala and you get such brilliant designs — get inspired by them and create your own masterpieces I am using simple earbuds — buy the cheap ones, not branded ones for this work if you do not have this already at home — earbuds get a lot of use in painting other than dot painting — you can take paint from the bottles without messing up brushes, mix color in the painting, clean under fingernails after painting, etc.

All Custom Fabrication Inc.

Light shades where the light falls. Hi Amanda There may be three reasons 1.

Custom Architectural Design and Fabrication

The paint may be of bad quality. You may have applied the paint in very very thick layers — those take a long long time to dry though it may seem like it is dry on touching. Start applying the paint as in the picture below.

Decorative Painting Store

Find information and resources on , , business development , products , and . We thrive on the challenge by taking any raw concept or idea and work with our customers through the design process to a finished product.
