Notes: Bibliography: p. 82-83.  
This edition was published in 1971

It is interesting and important for the analysis of brain evolution and variability in brain structure and function. . A new crocodilian from the Eocene of Utah.

### Agriochoerus

The Melvil Decimal System is NOT the Dewey Decimal System of today. For these reasons, this specimen is not identified beyond the level of Globidonta.

### Early Tertiary vertebrate faunas Vieja Group Trans

All localities from which crocodilians have been collected are regarded as early

Filesize: 28.31 MB

Uintan in age based on associated large mammals Stevens et al.

### Fossil crocodylians from the Eocene Devil's Graveyard and Canoe Formations, Brewster County, Texas.

Die Crocodilier aus dem mittleren Eozän des Geiseltales bei Halle. The residual, or what is left over after the body-size component is taken care of, tells us how much brain is attributable to encephalization.

## A History of Savanna Vertebrates in the New World. Part I: North America, Annual Review of Ecology, Evolution, and Systematics

Erano presenti due robusti superiori, arcuati e scanalati; questi denti erano separati dai premolari da un lungo ; gli erano molto piccoli. On *Stagonolepis robertsoni*, and on the evolution of the Crocodilia.
