### Hairy bittercress: A weed to watch out for

Augustinegrass at temperatures above 90 degrees may cause temporary growth regulation. Like many members of the mustard family, hairy bittercress sets seed prolifically.

### Bitter Grass by T.V. Olsen

. Copyright © 2021 Clemson University Clemson Cooperative Extension 103 Barre Hall Clemson, SC 29634 SC residents only HGIC clemson. It has both preemergence and postemergence properties.

### Bitterblue St. Augustine

The other difficulty with Bitterblue is that there are few sod production farms that actually produce Bitterblue. The sesquiterpenes known as caleicines and caleochromenes may be active in its effects on sleep. Postemergence Herbicides: Postemergence herbicides are most effective when applied to young weeds.

### Garden Guides

Geography Because Bitter Blue grass is a type of St. Both of these infections can be controlled by using fungicides.

### Sod Grass

Wear protective clothing or equipment as required by the label when mixing or applying pesticides. Preemergence Herbicides: Isoxaben can be applied as a preemergence herbicide in landscape beds around certain well-established ornamental shrubs and trees to prevent chamberbitter from growing from seed.

### Chamberbitter

It is low water use, low maintenance plant that tolerates dry soils, drought, and air pollution. Consider these questions and then use the information

and links below to choose the correct grass for your application. Bitterblue has a very coarse texture.

### **Bitterblue St. Augustine**

Pesticide Safety Always read the pesticide label and follow its directions exactly. . It is a clumping grass and spreads by rhizomes.

### **Bitterblue St. Augustinegrass**

Plants can also be shielded by covering with cardboard or something similar that is disposable.
