Low

Kathy Jacobson Kathy Jacobson has 30 years of industrial experience, specializing in applying Design for Manufacturing and Affordability in the early product design phases. His two USAF Damage Tolerant Design Handbooks have provided guidance and data for the design and management of aircraft structures.

Low

He was also one of the recipients of the 2011 DARPA Young Faculty Award. Jer-Liang Yeh Jer-Liang Andrew Yeh recognized for his outstanding work as a researcher, leader, and educator.

Finite elements in the analysis of pressure vessels and piping—a bibliography (1976)

Reactor water environmental degradation dependence on temperature is determined using variations of the statistical models developed by Chopra and Shack, Higuchi, Iida, Asada, Nakamura, Van Der Sluys, Yukawa, Mehta, Leax and Gosselin, references 1 through 22. Her research has

made significant contributions to bio-inspired adhesives and the use of resonant devices for sensing and signal processing.

Design & FEA of Reactor Pressure Vessel

He has received numerous awards and serves on the editorial boards of 20 international journals. He was recognized as the BCoE 2013 Outstanding Faculty Researcher for all his accomplishments.

A Baseline and Vision of Ultrasonic Guided Wave Inspection Potential

She has been instrumental in the development of several innovative programs for the College of Engineering at both undergraduate and graduate levels and for underrepresented student groups. The procedure also includes an approach for developing fatigue life evaluation curves for aged weldments based on crack initiation, crack growth and fracture. When the critical crack size was reached, fast fracture occurred.

A Baseline and Vision of Ultrasonic Guided Wave Inspection Potential

Zamrik ; general proceedings editor, S. Fadda is product manager of the nuclear separation systems business unit at Peerless Mfg. Rajat Mittal Rajat Mittal has made seminal contributions in the area of computational fluid dynamics.

the 2010

Tomkins, presented at International Nuclear Power Plant Aging Symposium, Washington, D. Nirmalan's experience includes program managing and execution, writing and presenting proposals and reports, designing engine tests and experimental rigs, modeling cooling techniques, writing data acquisition software, and acquiring and analyzing data.
