Innovation and Social Learning: Institutional Adaptation in an Era of Technological Change (International Political Economy Series): Gertler, M., Wolfe, D.: 9781349412877: vivchar.tom.ru: Books

London: University College London Press, pp. One of the challenges of introducing a portfolio of technologies within CSA is to design and build human capital and procedures to ensure effective implementation with appropriate safety mechanisms Rennings. Addressing these challenges require significant institutional innovations.

Innovation and Social Learning: Institutional Adaptation in an Era of Technological Change

We classify them in three categories: technological innovations, managerial innovations and institutional innovations. A viable and effective research infrastructure contributes significantly to the introduction of new innovations. Because mitigation and adaptation to climate change have properties of public goods as we argued, climate change may result in damage to public infrastructure and human life throughout the world , the finance should rely on public sources in addition to private ones.

Institutional change and innovation system transformation: A tale of two academies

Innovations that change the direction of education replace or displace existing models. Furthermore, a key element in developing policy is alliance between the private and public sector that will allow smooth technology transfer and efficient commercialization of new innovations.

» Meric Gertler

As universities must seriously rethink and redesign their educational offerings to face this new situation, Covid-19's disruptive effects have created not only fertile opportunities for transforming HEIs but also difficulties and challenges in this process. The framework became a location to articulate and explore four integrated dimensions of responsible innovation: anticipation, reflexivity, inclusion and responsiveness. Thus, new systems will incorporate modern methods with traditional models adjusted to local conditions Nyong et al.

While these case studies cover a subset of adaptation options for which there is solid empirical evidence in developing country contexts, there is a broader range of adaptation activities that we will also cover, including external migration, use of trade and aid policies, and physical inventories.
