## PREDATION

Rivero: Measurements of productivity of turtle grass flats, reefs, and the Bahia Fosforecente of southern Puerto Rico.

**Tubercle loss in Spatangoids (Echinodermata, Echinoides): Original skeletal structures and underlying processes**

Lovenia elongata lacks funnel-building tube feet and maintains only a short respiratory funnel, 1 to 2 cm in length, by using the apical tuft spines.

## TORTONIAN CLYPEASTER FAUNA (ECHINOIDEA: CLYPEASTEROIDA) FROM GAVDOS ISLAND (GREECE)

George Allen and Unwin Ltd. Phylogeography of the pantropical sea urchin *Eucidaris* in relation to land barriers and ocean currents. Nouveau manuel de Bionomie Bentique de la Mer Méditerranée.

**Tubercle loss in Spatangoids (Echinodermata, Echinoides): Original skeletal structures and underlying processes**

Complete tests and fragments are encrusted by barnacles Fig.

## Biblio K

Rose and Poddubiuk explored the morphological variations in fossil Clypeaster and considered several features of the test, such as the ambital outline, test profile, petal shape and tuberculation in order to infer the mode of life of fossil species. They have been described as bulk sediment swallowers feeding on organic material coatings of coarse sediment grains ;

Because physical properties of the sediment and the abundance of other burrowers are also factors affecting mobility, it is not now possible to predict what situations will render this mechanism of interaction important to natural communities.

#### **Echinoids of Grand Cayman**

Vega Vera Instituto de Geología, UNAM, México for their helpful suggestions and comments that improved the manuscript.
