Lung Volume Reduction Surgery

Eur Respir J 1997; 10 1:208-218. A meta analysis Berger et al, 2005 reported that a selected subset of patients with advanced, heterogeneous emphysema and low exercise tolerance as indexed by the 6-min walk distance experienced better outcomes from LVRS than from medical therapy.

Lung volume reduction surgery

A surgical approach to pulmonary emphysema. Cost effectiveness of lung-volume-reduction surgery for patients with severe emphysema.

Lung volume reduction surgery

Our program is the first in the state of Georgia to offer the endobronchial lung volume reduction valves for patients with severe emphysema. Patient selection, procedural expertise, and postprocedural care are equally important components of a successful outcome. These researchers considered randomized or quasi-randomized clinical trials that compared NIPPV in the immediate post-operative period after pulmonary resection with no intervention or conventional respiratory therapy.

Lung Volume Reduction Surgery

Who is a Candidate for LVRS?. Am J Respir Crit Care Med.
